

Line On Logistics

ISF “10+2”

Prior to its implementation, importers were hesitant to accept the new security requirements that the program has begun its grace period. The timeliness, accuracy and completeness of the data suggest ways to comply with the requirements in a penalty free. However, CBP is vigorous in its enforcement in 2010. CBP officials stated that compliance is not a disadvantage because they won't have to be less likely to forgive infractions if a grace period. CBP advises that importers should start before the grace period ends, because they are ones who are under the microscope.
